

**Taikisha India Awarded Construction Project for New
Paint Plant by Daimler India.**

Taikisha Engineering India Ltd. (Managing Director: K. Hashimoto), one of the Taikisha's overseas operating bases having their corporate headquarters in Shinjuku, Tokyo (President: Uenishi Eitaro) has been awarded with the paint plant construction project by an Indian Automaker, Daimler India Commercial Vehicles Pvt. Ltd.

■ Back ground of project

The project facility is for a new assembly line for Daimler India Commercial Vehicles Pvt. Ltd. to manufacture trucks. The project is the full turnkey excluding plant building covering Painting Facilities, Conveyor Systems, Robotic Paint Applicators, and Paint Supply Systems.

Daimler India is a 100% owned subsidiary of Daimler AG, the world's largest German truck manufacturer. The new plant project in Chennai is intended for manufacturing trucks for the Indian market.

■ Back Ground of project Awarded

Taikisha has been successful in many painting plant constructions since the establishment of Taikisha Engineering India Ltd. in 1995. Taikisha believes that the success in being awarded the project is the result of promoting localization of its operation in India to establish and manage its subsidiary.

■ For Outlook in Future

Taikisha intends to continue aggressive efforts to polish its world-class painting technologies in developing the Indian Market.
